Art Unit: 3752

Response to Amendment

- 1. Applicant's amendment of February 17, 2004 is entered as paper number 10.
- 2. Applicant's arguments have been considered but are moot in view of the new ground(s) of rejection.
- 3. The allowance of claims 5, 13 are hereby withdrawn.
- 4. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim Rejections - 35 USC § 102

5. Claims 1-3, 5, 6, 9-11, 13, 14, 16, and 21 are rejected under 35 U.S.C. 102(b) as being anticipated by Bert.

Bert shows a method of spraying coating liquid, the method comprising the steps as recited including the accessory liquid being metered into the spray jet at a location outside of the liquid atomizer.

Claim Rejections - 35 USC § 103

6. Claims 4 and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bert.

Regarding depositing the accessory liquid in the spray jet at a number of locations as recited, it has been held that mere duplication of the essential working parts of a device involves only routine skill in the art.

7. Claims 7 and 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bert in view of Weinstein et al.

Application/Control Number: 10/042,394

Art Unit: 3752

Weinstein et al. teach a rotary atomizer spray gun in which rotation of the atomizer helps in the atomizing the spray material. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified the device of Bert by providing a rotary atomizing spray head as taught by Weinstein et al. to help the atomization process of the spray liquid.

Allowable Subject Matter

8. Claims 8 and 17-20 are allowable.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Harrison et al. and Shelton-V are pertinent to Applicant's invention.
